# FormaliSE 2014

FME Workshop on Formal Methods in Software Engineering

www.formalise.org

**WEST**  **F M&&T**

# Possible subjects for discussion

- Are light-weight formal approaches preferred over complete rigorous application of formal methods?

- The education problem: how would companies like to see it and where could it be improved?

- Is modeling less fun than programming? And if so: is that a problem?

- Are formal methods applicable to (large) real world problems? Where do they fall short?

- Are formal methods only useful in the specification phase of a project?

# + See you next year in Florence!
